TABA-  
 Cigarette end extinguishing insert - further burning prevented and visible  
 indication can be used:  
 TABAK ENGINEERING GMBH 17.02.73-DT-308658:  
 P15 (29.08.74) A24d-01

An ampoule containing e.g. water may be included near  
 the mouthpiece end of the cigarette, designed to ensure that  
 the burning area is extinguished at that point. If a filter tip  
 is incorporated, an ampoule may be located on the joint line  
 or a powder can be incorporated quite near to the joint line.  
 Visible warning, e.g. a colouring agent may be inserted in  
 powder form near the joint line. 17.2.73 as 308,658.
